

How to install Windows 10?

1.Prepare a U disk with a storage capacity of at least 8G

2.Right click and select format... Format U disk to NTFS format, click start to finish formatting

3. Copy your system files to U disk, and it must be in the root directory of U disk.

4. Insert the U disk, boot your mini pc and immediately press F7 repeatedly to enter the boot device menu interface.

5. Select UEFI (Please confirm the position where your U disk is inserted. The two UEFIs in the back of the picture are the controllers of the mouse and keyboard respectively. The UEFI that the U disk is inserted into is the one you need to choose) and press Enter to enter.

6. Enter the loading system interface, just wait for automatic loading.

7. The installation window pops up, as shown in the figure, you need to select the disk installed by the system (the purple box above corresponds to your disk), please enter the number according to your own situation, such as input 0 and press Enter

```
X:\windows\system32\cmd.exe
Microsoft DiskPart version 10.0.18362.1
Copyright (c) Microsoft Corporation.
On computer: MINWINPC

Disk ###  Status       Size       Free       Dyn  Gpt
-----  -
Disk 0    Online       931 GB     1024 KB   *
Disk 1    Online       476 GB     0 B       *
Disk 2    Online       14 GB      1024 KB   *

Leaving DiskPart...

*****
